

End Term (Odd) Semester Examination November 2025

Roll no.....

Name of the Course and semester: MCA - I

Name of the Paper: Probability and Statistics

Paper Code: TMC 111

Time: 3 hour

Maximum Marks: 100

Note:

- (i) All the questions are compulsory.
- (ii) Answer any two sub questions from a, b and c in each main question.
- (iii) Total marks for each question is 20 (twenty).
- (iv) Each sub-question carries 10 marks.

Q1.

(2X10=20 Marks)(CO1)

a. Define probability. Then solve: From the digits 1, 2, 3, 4, 5 we choose one digit first and then a second digit from the remaining four. All 20 ordered outcomes are equally likely. Find the probability that an odd digit is chosen

- (i) on the first draw,
- (ii) on the second draw,
- (iii) on both draws.

b. What is random variable? If a pair of dice is rolled, find the probability distribution for getting their sum 2, 3, 4, 5, 6, 7 and 8.

c. Define the following in brief.

- (i) Law of expectation,
- (ii) Baye's theorem.

Q2.

(2X10=20 Marks)(CO2)

a. Define probability density function. If the variable x has the probability density

$$F(x)=\begin{cases} Ke^{-3x} & x > 0 \\ 0 & \text{otherwise} \end{cases}$$

Find the value of K.

b. Define Geometric distribution and find the formula for 1st and 2nd moment.

c. Define the following in brief.

- (i) Binomial distribution,
- (ii) Normal distribution.

Q3.

(2X10=20 Marks)(CO3)

a. Define the following.

- (i) Correlation,
- (ii) Regression,
- (iii) Karl Pearson's coefficient of correlation,
- (iv) Multiple regression.

b. Compute Spearman's rank correlation coefficient r for the following data.

| Person | A | B | C | D | E | F | G | H | I | J |
|-----------------|---|----|---|---|---|---|---|---|---|----|
| Rank in Maths | 9 | 10 | 6 | 5 | 7 | 2 | 4 | 8 | 1 | 3 |
| Rank in Physics | 1 | 2 | 3 | 4 | 5 | 6 | 7 | 8 | 9 | 10 |

End Term (Odd) Semester Examination November 2025

c. Find the regression line of y on x and x on y for the following data.

| | | | | | | | | |
|---|---|---|---|---|---|---|----|----|
| x | 1 | 3 | 4 | 6 | 8 | 9 | 11 | 14 |
| y | 1 | 2 | 4 | 4 | 5 | 7 | 8 | 9 |

Q4.

(2X10=20 Marks)(CO4)

- a. Define the following.
 - (i) Population,
 - (ii) Sample,
 - (iii) Null hypothesis,
 - (iv) Test of significance.
- b. In a sample of 1000 people, 540 are rice eaters and the rest are wheat eaters. Can we assume that both rice and wheat are equally popular at 1% level of significance. Given that the z value at 1% level of significance for two tailed test is 2.58.
- c. Two investigators study the income of group of persons by the method of sampling. Following results were obtained by them. Test whether any investigator is suspected? Given $\chi^2_{0.05}(2) = 5.991$.

| Investigator | Poor | Middle Class | Well to do |
|--------------|------|--------------|------------|
| A | 160 | 30 | 10 |
| B | 140 | 120 | 40 |

Q5.

(2X10=20 Marks)(CO5)

- a. Define time series and its component. Also calculate the five yearly moving average of the following.

| Year | 1950 | 1951 | 1952 | 1953 | 1954 | 1955 | 1956 |
|--------|------|------|------|------|------|------|------|
| Values | 105 | 115 | 100 | 90 | 80 | 95 | 85 |

- b. Fit a trend line to the following data by the least square method and find the production in 1995.

| Year | 1985 | 1987 | 1989 | 1991 | 1993 |
|------------|------|------|------|------|------|
| Production | 18 | 21 | 23 | 27 | 16 |

- c. Use the monthly averages to determine the monthly indices for the following data of production of a commodity for the year 2002, 2003, 2004.

| Month | Jan | Feb | March | April | May | June | July | Aug | Sep | Oct | Nov | Dec |
|-----------|-----|-----|-------|-------|-----|------|------|-----|-----|-----|-----|-----|
| Year 2002 | 12 | 11 | 10 | 14 | 15 | 15 | 16 | 13 | 11 | 10 | 12 | 13 |
| Year 2003 | 15 | 14 | 13 | 16 | 16 | 15 | 17 | 12 | 13 | 12 | 13 | 14 |
| Year 2004 | 16 | 15 | 14 | 16 | 15 | 17 | 16 | 13 | 10 | 10 | 11 | 15 |
