

Term Evaluation Theory (Even) Semester Regular Examination February 2026

Roll no.....

Name of the Course and semester: BCA/BSc(IT)

Semester-II

Name of the Paper: Introduction to Object-Oriented programming.

Paper Code: TBC-202/TBI 202

Time: 1.5 hour

Maximum Marks: 50

Note:

- (i) Answer all the questions by choosing any one of the sub questions
- (ii) Each question carries 10 marks.
- (iii) ~~Write specific COs against each question.~~

Q1. (10 Marks)

- a. Describe the important features of OOPs. How it is different from procedural oriented approach? CO-1

OR

- b. Write short notes on the following: CO-1
- (i) Token (ii) string (iii) Bit-wise operators

Q2. (10 Marks)

- a. Write a program in C++ to input N numbers, and find and print all the duplicate numbers only.
i.e. input numbers 2 3 4 5 6 7 2 3 4 7 output : 2 3 4 7 CO-2

OR

- b. Explain all control statements used in C++ with suitable examples. CO-1

Q3. (10 Marks)

- a. What are the various storage classes in C++? Elaborate with proper example. CO-1

OR

- b. What are the various jumping statement in C++? Write a code to print the table of N using jumping statement (**Do not use loop**) only. (N will be input by the user) CO-2

Q4. (10 Marks)

- a. Write a code in C++ to input a matrix of order M X N and print the sum of each rows and column. CO-2

OR

- b. What is a pointer? Explain with a suitable example. Create a function sum() that receives two parameters (an integer array and its size) and return the largest number from array. CO-2

Q5. (10 Marks)

- a. How string data type is different from the character array. Explain the functions used with string data type. CO-2

OR

- b. Explain the difference between structure and union taking a suitable example. Declare a structure STUDENT with members Name, Sub, Roll, Marks. Now declare two variables of STUDENT Structure and Display their values using structure pointer. CO-2
