

Term Evaluation Theory (Even) Semester Regular Examination February 2026

Roll no.....

Name of the Course: BCA/BSc IT

Semester: 4th

Name of the Paper: Introduction to Software Engineering

Paper Code: TBC 402/TBI 402

Time: 1.5 hour

Maximum Marks: 50

Note:

- (i) Answer all the questions by choosing any one of the sub-questions
- (ii) Each question carries 10 marks.

Q1. (10 Marks)

a. Analyze the characteristics of a good software product and explain how they influence software quality (CO1)

OR

b. Analyze the role of a system analyst during the requirement analysis phase of SDLC. (CO2)

Q2. (10 Marks)

a. Examine the stages of SDLC and analyze how each stage contributes to successful software development. (CO1)

OR

b. Differentiate between functional and non-functional requirements with suitable examples. (CO2)

Q3. (10 Marks)

a. Analyze the Waterfall Model and discuss situations where it is most appropriate. (CO1)

OR

b. Analyze the importance of a Software Requirement Specification (SRS) document in software projects. (CO2)

Q4. (10 Marks)

a. Examine the Spiral Model and explain how risk analysis is integrated into each iteration. (CO1)

OR

b. Analyze the concepts of cohesion and coupling and explain how they affect software maintainability. (CO2)

Q5. (10 Marks)

a. Analyse the advantages of top-down design over bottom-up design approaches. (CO2)

OR

b. What are software requirements? Differentiate between functional and non-functional requirements. (CO2)
