

Term Evaluation Theory (Even) Semester Regular Examination February 2026

Roll no.....

Name of the Course: BCA / BCA AI/DS

Semester: VI

Name of the Paper: Introduction to Mobile Application Development

Paper Code: TBC 602 / TBD 603 (b)

Time: 1.5 hour

Maximum Marks: 50

Note:

- (i) Answer all the questions by choosing any one of the sub-questions
- (ii) Each question carries 10 marks.

Q1. (10 Marks)

- a. Critically examine the common myths associated with mobile app development. Evaluate how these misconceptions affect business decision-making and project planning, and suggest strategies to overcome them. CO1

OR

- b. Assess the benefits of mobile applications for business growth. Design a conceptual mobile application interface that ensures accessibility for differently-abled users and justify your design choices based on usability and accessibility principles. CO1

Q2. (10 Marks)

- a. Explain the Android Operating System in detail. Discuss the history and evolution of Android, and their key features. Analyze how these features have contributed to the popularity of Android as a mobile operating system. CO2

OR

- b. Describe the Android architecture with a neat diagram. Explain the role of each layer in the architecture and analyze how this layered design supports performance, security, and application development. CO2

Q3. (10 Marks)

- a. Explain the role of the super keyword in Android and its significance when used within the onCreate () method of an Activity. Explain with example. CO3

OR

- b. Explain the process of creating a new Android project, setting up an Android Virtual Device (AVD), and running the app on the Android Emulator. Evaluate the importance of each step in ensuring a smooth development workflow. CO2

Q4. (10 Marks)

- a. Create a simple Android application that takes input from the user using an EditText and displays the entered text in a TextView when a button is clicked. The application should have:

- One EditText for user input
- One Button to submit the input
- One TextView to display the output

CO6

OR

- b. Explain the difference between AVD (Android Virtual Device) and the Android Emulator. Discuss their roles in Android application development, their components, and how they work together. Also compare their advantages and limitations with suitable examples. CO1

Q5. (10 Marks)

- a. Explain the different Mobile Application Development Platforms used to build mobile applications. Compare at least two platforms (such as Android, iOS, and cross-platform frameworks) in terms of architecture, development tools, programming languages, performance, and deployment. Also discuss

Term Evaluation Theory (Even) Semester Regular Examination February 2026

the advantages and limitations of each platform with suitable examples. CO1

OR

- b. Explain the importance of effective use of screen real estate in mobile applications and discuss how understanding mobile application users influences UI/UX design. Describe the principles, challenges, and design strategies involved, and illustrate how user behavior, device constraints, and usability considerations affect mobile app interface design. CO1
