Section B

- Q4. Case Study (CO5) (20 Marks)

Attune Infotech Ltd., a rapidly growing IT services organization, has recently hired a large number of employees to support new client projects in India and overseas. The company follows a traditional talent acquisition approach where recruitment is completed quickly, and new hires are given a one-day orientation program covering company policies, rules, compliance requirements, and administrative formalities. However, after joining their respective teams, many new employees report confusion regarding job roles, performance expectations, reporting relationships, and organizational culture. Managers assume that once orientation is completed, employees should be able to perform independently, resulting in minimal managerial support, mentoring, or feedback during the initial months. Within the first six months of joining, Attune Infotech experiences high early attrition, low employee engagement scores, and delayed project delivery timelines. Exit

Term Evaluation Theory (Even) Semester Regular Examination February 2026

interviews reveal that while employees were aware of company policies, they felt disconnected from the organization, inadequately trained, and unsupported in adapting to their roles. Senior management is now concerned that the absence of a structured onboarding process is negatively impacting employee productivity, engagement, and long-term retention, thereby affecting the organization's employer brand and overall talent management strategy.

1. How did the absence of a structured onboarding process at Attune Infotech Ltd. impact employee engagement and early attrition? (CO5)
2. Why was the one-day orientation program insufficient to support new employees' performance and organizational integration at Attune Infotech Ltd.? (CO5)
