

Term Evaluation Theory (Even) Semester Regular Examination February 2026

Roll no.....

Name of the Course: MCA AIDS

Semester: II

Name of the Paper: Data Warehousing and Mining

Paper Code: TMD 202

Time: 1.5 hour

Maximum Marks: 50

Note:

- (i) Answer all the questions by choosing any one of the sub-questions
- (ii) Each question carries 10 marks.

Q1.

(10 Marks)

- a. Define data mining and explain the fundamental concepts involved in data mining. Discuss the knowledge discovery process in detail with a neat diagram. Co1

OR

- b. Explain the major data mining functionalities such as characterization, discrimination, association analysis, classification, clustering and outlier analysis with suitable example. Co1

Q2.

(10 Marks)

- a. What is data warehouse? Explain the features of data warehouse. State why, for the integration of multiple heterogeneous information sources, many companies in industry prefer the update-driven approach (which constructs and uses data warehouses), rather than the query-driven approach (which applies wrappers and integrators). Describe situations where the query-driven approach is preferable over the update-driven approach. Co1

OR

- b. List and describe the five primitives for specifying a data mining task. Co1

Q3.

(10 Marks)

- a. Describe the classification of data mining system based on
- i. Types of data mined
 - ii. Types of knowledge discovered
 - iii. Techniques used

Co1

OR

- b. Define data cubes. Explain different multidimensional data model with suitable example. Co2

Q4.

(10 Marks)

- a. What is OLAP? Describe how is OLAP system different from OLTP. Co1

OR

- b. i. What is data mart? Explain its types and compare dependent and independent data marts.
ii. Define concept hierarchy with an example. Co2

Term Evaluation Theory (Even) Semester Regular Examination February 2026

Q5.

(10 Marks)

- a. Describe the three-tier data warehouse architecture. From the architecture point of view, define the different data warehouse models. Co2

OR

- b. Define data warehouse measures. Explain the categorization of measures and the methods of measure computation with examples. Co2

Note For the question paper setters:

- Question paper should cover all the COs of the course.
- Please specify COs against each question.
