

Term Evaluation Theory (Even) Semester Regular Examination February 2026

Roll no.....

Name of the Course: MCA

Semester: 4th

Name of the Paper: Software Project Management.

Paper Code: TMC 414

Time: 1.5 hour

Maximum Marks: 50

Note:

- (i) Answer all the questions by choosing any one of the sub-questions
- (ii) Each question carries 10 marks.

- Q1. (10 Marks)
a. Define a Software Project. Compare software projects with other types of projects on the basis of complexity, uncertainty, risk, deliverables, and management approach. (CO1)
OR
b. Explain the importance of Software Project Management (SPM). Discuss how effective SPM contributes to achieving project objectives. (CO1)
- Q2. (10 Marks)
a. Describe in detail the major activities involved in Software Project Management and explain their significance throughout the project life cycle. (CO2)
OR
b. Who are the stakeholders in a software project? Identify different types of stakeholders and explain their roles and responsibilities. (CO2)
- Q3. (10 Marks)
a. Explain the steps involved in project planning, starting from project selection to review and execution of the project plan. (CO2)
OR
b. What is meant by project success and project failure? Analyze the common causes of failure in software projects with suitable examples. (CO2)
- Q4. (10 Marks)
a. What are software process models? Explain the Waterfall Model with a neat diagram. Discuss its advantages and limitations. (CO3)
OR
b. Explain the Spiral Model in detail. Justify why it is considered a risk-driven process model. (CO3)
- Q5. (10 Marks)
a. Explain the basis for software effort estimation. Compare Top-Down and Bottom-Up estimation approaches with their merits and demerits. (CO4)
OR
b. Describe COCOMO II as a parametric estimation model. Explain its components and the procedure for effort estimation. (CO4)
